Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 21-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 21 and 26, line 1, "the tire hanging device" lacks proper antecedent basis. Claim 27, line 2, "the axle" and "the vehicle" lacks proper antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21, 22, 24, and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Huot (US patent no. 3,979,035). Huot discloses a tire hanger comprising a tire hanging device comprising a hoist wrap section (20) arranged to engage a support member (12); a tire hanging section (18) arranged to engage a wheel; and a middle section (horizontal section shown in figure 3) disposed between the hoist wrap section and the tire hanging section, whereby the hoist wrap section is wrapped around the support member and moved to position the tire hanging section at a location selected by a user to hang the wheel; wherein the hoist wrap section is capable of accomodating

supports having varying dimensions (hook 20 inherently can further accommodate support 12 of increased width and length) of without the need for fasteners; wherein the middle section is capable of accommodating supports having varying dimensions such the tire hanging section is positioned to receive the wheel (32).

Applicant's intended use for a hoist vehicle is not accorded with patentable weight.

Claims 21-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Moran (US patent no. 1,480,829). Moran discloses a hanger capable of supporting a tire comprising a hoist wrap section (3, figures 1-2) of U-shaped arranged to engage a support member; a tire hanging section (4) of hook configuration and a middle section (1) disposed between the hoist wrap section and the tire hanging section, whereby the hoist wrap section is wrapped around the support member and moved to position the tire hanging section at a location selected by a user to hang items; wherein the hoist wrap section is capable of accomodating supports having varying dimensions without the need for fasteners; articulated section (12) with pivotable joint having a bearing assembly (hole not shown) receive pin (12) and friction locking device (6-8).

Applicant's intended use for a hoist vehicle, a tire or a wheel, axle hole of the wheel, axle of vehicle are not accorded with patentable weight. Moran's hanger is capable of being used on a hoist vehicle and capable of supporting a wheel at an axle hole of the wheel.

Applicant's argument filed 2/26/2004 regarding claims 21-40 are moot in view of the new grounds of rejections.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
